- Financial statements of ZAPA beton SK s.r.o. for the year ended 31 December 2019
- Notes to the Financial statements of for the year ended 31 December 2019
- Proposal for distribution of profits for 2019
- Auditor's Report

Company profile

The past and the present

ZAPA beton SK s.r.o., the leading producer of ready mixed concrete in Slovakia, was founded in 2001 as a wholly-owned subsidiary of ZAPA beton a.s., one of the largest producers of ready mixed concrete in the Czech Republic. The ZAPA beton Group is part of Germany's Dyckerhoff Group, which is included in the Italian holding Buzzi Unicem with global operations predominantly in production of cement and concrete.

2001: operation of 3 concrete mixing plants - in Hlohovec, Skalica and Piešťany.

2002: operation of 13 concrete mixing plants - in **Bratislava**, **Banská Bystrica**, **Nové Mesto nad Váhom**, **Humenné**, **Trebišov** and **Prešov**. In the same year, ZAPA beton SK s.r.o also acquired establishments in **Senica**, **Brezno** and **Michalovce** and expanded its scope of operations by acquiring ownership interests in ZAPA beton, s.r.o., Dyckerhoff Transportbeton Slovakia, s.r.o. and Slovpanel Beton, seated in **Košice**, **Martin** and **Žilina**, respectively.

2003: refurbishment of concrete mixing plants in Michalovce and Brezno. ZAPA beton SK s.r.o. built and got approved new concrete mixing plants equipped with a recycling facility in Nové Mesto nad Váhom and in Piešťany. The plant in Piešťany was fitted with technology for heating up the aggregate and water for mixing concrete batches all year round.

2004: a new concrete mixing plant was built in Košice, which replaced the old plant, and a mixing concrete plant in Žilina underwent a major reconstruction. In cooperation with STRABAG s.r.o. the Company began to operate a mobile mixing concrete plant Stetter M2 in Trnava.

2005: a production facility acquired in **Most near Bratislava**. At the end of 2005, ZAPA beton SK s.r.o. joined the Slovak Association of Concrete Producers (SAVT).

In **2006**, ZAPA concrete SK s.r.o. was the second largest company in the Slovak Republic in terms of the production volume of ready mixed concrete. It is the only company operating plants in all Slovak regions.

In 2007, the Company's turnover exceeded SKK 1 billion for the first time. This was partly due to its further expansion. Concrete mixing plants in Sered' and Banská Bystrica were partially reconstructed and, in addition to increased production capacity, they can maintain year-round operations. The plant in Sered' was also equipped with a new recycling facility. Following a complete refurbishment, the old concrete mixing plant at Most near Bratislava was relocated to a new plant in **Holíč**. Production was launched at a concrete mixing plant in **Trenčín**. The launch of a new plant in **Levoča** was a major success due to the installation of brand new efficient technology designed for year-round operation.

In 2008, ZAPA beton SK s.r.o. became the largest producer of ready mixed concrete in the Slovak Republic according to the production volume. A refurbished concrete plant in Prešov was put into operation in the spring, equipped with technology for year-round operation. In 2008, ZAPA beton SK s.r.o. purchased a 100% ownership interest in SONDA, s.r.o. At the end of 2008, the Company owned 22 concrete mixing plants, of which 21 were in operation.

In **2009**, ZAPA beton SK s.r.o. relaunched production at the refurbished Hlohovec plant, which in the same year took the 3rd place in the national SAVT competition for "The most environmentally-friendly concrete mixing plant" evaluated according to ERMCO rules. In March 2009, the lease of the Trenčín plant came to an end and production was discontinued.

The Company's subsidiary, ZAPA BETON HUNGÁRIA Kft, in **2010** leased a mobile concrete mixing plant, which was operated at a gravel site compound. In January 2010, ZAPA beton SK, s.r.o. acquired a 33.3% ownership interest in EURO BETON, s.r.o.

2011 was affected by the global financial crisis and its impact on the Slovak construction industry. The adopted austerity measures resulted in additional lay-offs and temporary shut-downs of the Brezno and Skalica plants.

The technology performance in the Michalovce plant was increased.

2012 saw a further decline in construction production, which totaled EUR 4,845.3 million, representing a drop of 12.5% year-on-year. All these factors affected the volume of ready mixed concrete production and ZAPA beton SK's financial results. The Company implemented new austerity measures and prepared for the sale of unused assets.

Despite the unfavorable developments in the construction sector in 2013, ZAPA beton SK succeeded in increasing its production by nearly 22% year-on-year, in particular due to its participation in the construction of the Bory Mall in Bratislava and the construction of motorway sections in eastern Slovakia.

In 2013, ZAPA beton SK sold its ownership interest in EURO BETON, s.r.o. to another buyer and also sold its Brezno plant.

2014 was the year of the implementation of changes and restructuring of the ZAPA beton Group's companies. The first phase of the Shared Services Center project in Hranice na Moravě was completed and the center currently provides accounting and finance services for ZAPA beton SK s.r.o. In October 2014, SONDA, s.r.o. merged with ZAPA beton SK s.r.o.

The Company sold the Senica plant, shut down the plant in Martin and leased the plant in Holíč.

In 2015, ZAPA beton SK s.r.o. followed up on the changes in the Company and the ZAPA beton Group and continued the implementation of Buzzi Unicem's standards in all areas, restructuring of the Company and mapping out and modification of corporate processes and rules.

The Company maintained a solid position on the Slovak market throughout 2015, boosted its production and increased the EBITDA indicator.

ZAPA beton SK s.r.o launched a major project, "KOVV – All Involved in Quality and Business", across the Company, aimed at offering the best quality and state-of-the-art products and services tailored to customer requirements.

The Company won a tender for the supply of ready mixed concrete for one of the largest projects in the history of the ZAPA beton Group - the construction of a two-tube tunnel, bridges and roads as part of the construction of the D1 motorway near Žilina: Lietavská Lúčka - Višňové - Dubna Skala by the Italian company SALINI IMPREGILO. Concreting has already begun and will go on for 4 years.

In 2016, the parent company ZAPA beton a.s. marked the 25th anniversary of its founding and Slovak ZAPA beton SK s.r.o. marked its 15th anniversary. We approached this important milestone as a challenge to continue to grow and improve the Company - we have set more ambitious goals in terms of production and quality. We focused on maintaining a significant position on the Slovak market. We pay increased attention to the quality of products and services and customer needs through the KOVV project. Our website has been redesigned. We have implemented new technology software and optimized the management systems of our concrete mixing plants.

Step by step we have been implementing changes in employee remuneration and we provide some new employee benefits.

The ZAPA beton Group has acquired a new Hungarian company operating a gravel site in Halasz.

2017 was a successful year for the ZAPA beton Group; the production volume of the whole group rose by 10% year-on-year. Growth was recorded in each region where the ZAPA beton Group operates, but Slovakia saw the fastest growth rate, primarily due to supplies of concrete for the construction of a two-tube tunnel, bridges and roads as part of the construction of the D1 motorway near Žilina: Lietavská Lúčka - Višňové – Dubná Skala by the Italian company SALINI IMPREGILO.

At the end of 2017, the Company signed another major contract with D4R7 for supplies for the construction of the Bratislava ring road, scheduled to commence in the first half of 2018 and to continue for 30 months.

ZAPA beton SK s.r.o continued to implement Group processes and standards and new software in technology, transport and production controls. The Company's restructuring was completed. Optimization of the production plants network resulted in increased labor productivity and profitability per production unit.

The Company's NEMO project continued with a marketing campaign, and we also focused on customer perception of this project as added value for all.

We are proud to be able to provide a special product for any application and, if necessary, we can design a special "tailor-made" product.

2018 was the year in which we commenced the supplies for another major transport project in Slovakia – D4 Jarovce – Rača motorway section and R7 Bratislava Prievoz – Holice sections as part of the Bratislava ring road, the supplies totaled EUR 197,000 m3. We built a mobile concrete mixing plant Rapid, which totaled 3m3, and refurbished a concrete mixing plant at Most near Bratislava.

The 2018 production volume again exceeded half a million m3 and for the third year in a row we were the largest producer of ready mixed concrete in the Slovak Republic.

2019 began with a negative finding that our ordering party Salini Impregilo ceased participation in the D1 - Lietavská Lúčka-Višňové-Dubná skala project and that during the project we produced 4,300m3 instead of the planned 185,000m3 (during 01-02/2019). Subsequently, we closed and decommissioned the concrete mixing plants, and terminated employment contracts with all employees. The concrete plants are approved for use, with a valid permit to use. We will keep the positions until a tender for a new contractor of the project is completed. After assessing the situation on this project and realizing its impact on the financial outcome, we developed an Action Plan to achieve 80% of the 2019 Plan and other non-financial objectives. We managed to fulfill this plan to 83%.

A new important project of 2018, D4 Jarovce – Rača motorway section and R7 Bratislava Prievoz – Holice sections, continued during 2019 when we supplied to our customer, D4R7 Construction s.r.o., 97.000m3 that was more than we had expected (75.000m3).

In Bratislava, we shut down the plant in Stará Vajnorská at the end of June, and opened a new plant on Staviteľská Street (we acquired the land in 12/2017), with a production volume of 2.5m3, in July.

First time in years we put on the market our own MP36 and MP42 concrete pumps.

We almost fully outsourced the concrete transport and had only one concrete mixer driver (in Banská Bystrica) as at 31 December 2019.

Our gravel pits in Ducová and especially in Most near Bratislava achieved excellent results.

ZAPA beton SK s.r.o. also supplies **aggregates**, which are the raw material needed for the production of ready mixed concrete. In 2002, the Company began to operate a gravel site in Drahovce - Madunice. In late 2006, the extraction of gravel in the Drahovce mining area was terminated and the operation, including machinery, was relocated to a newly opened gravel site in Považany. Gravel extraction in Považany was terminated as at 31 December 2011 and another gravel site commenced production in Ducov.

Through its subsidiary SONDA, s.r.o. the Company operates a gravel site at Most near Bratislava and through its Hungarian subsidiary ZAPA BETON HUNGÁRIA Kft. a gravel site in the Hungarian town of Zsujta.

Gravel extraction in Zsujta, Hungary, was halted in 2018; and we started gravel extraction in the Halaszi gravel site.

In our plants **we implement and maintain the Quality Management System** complying with the requirements of the STN EN ISO 9001 standard. As at 31 December 2014, the QMS had been implemented in 12 operations and the administration. In 2015, the Hlohovec and Sered plants and the administration were awarded the quality certificate EN ISO 14001:2004.

In 2016, after shutting down the operation of the Levoča plant, the quality management system was implemented at 11 production plants.

In respect of the Quality Management System, 2017 was a year of its expansion. Two more production plants were awarded ISO 9001 and 14001 certificates - mobile concrete mixing plants Višňové and Dubná Skala.

In 2018 the recertification and extension of scope of operations included in the quality management system were carried out in compliance with ISO:2015. At present, 17 concrete mixing plants and also the gravel sites in Most near Bratislava and in Ducov have been awarded the ISO:2015 quality certificate. In 2018 the recertification and extension of scope of environmental management system were carried out in compliance with ISO 14001:2015. At present, the following concrete mixing plants have been awarded ISO 14001:2015 certificates: Bratislava, Hlohovec, Sered', Višňové and Dubná Skala.

The Company consists of the administration headquarters seated in Bratislava and production centers across Slovakia.

The Company has no foreign branch.

Company shareholders

Distribution of ownership interests as at 31 December 2019: ZAPA beton, a.s. 99.957% Cement Hranice, akciová společnost 0.043%

Company identification information

Business name: ZAPA beton SK s.r.o.

Business registration No. (IČO): 35 814 497 Tax Identification No. (DIČ): SK2020283573

Registered office: Vajnorská 142, P.O. Box 99, 830 00 Bratislava

 Telephone:
 +421 2 49105411

 Fax:
 +421 2 49105420

 Http:
 www.zapa.sk

 E-mail:
 zapa@zapa.sk

 Date of incorporation:
 18 June 2001

Legal form: limited liability company

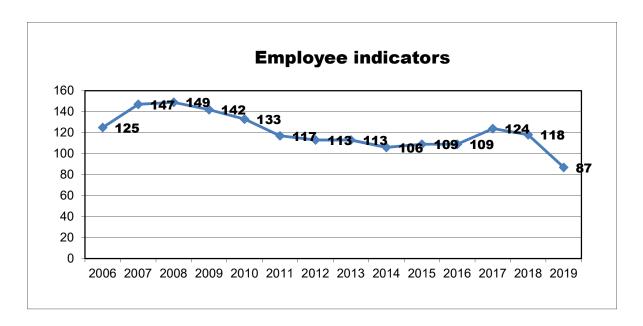

Registered capital: EUR 11,859,396

Scope of business:

- -production and sale of concrete mixtures (ready mixed concrete)
- -advertising and promotional activities
- purchase of goods for resale to final consumers (retail)
- - purchase of goods for resale to other trades (wholesale)
- mediation of purchase, sale and lease of real estate
- lease of properties with the provision of ancillary services
- - administrative work
- factoring and forfaiting
- lease of motor vehicles
- brokerage

- - advisory related to the scope of business
- mining activities pursuant to Section 2 b/, c/, d/, e/ and Section 3 s/ of Act No. 51/1998 Coll., on Mining, Explosives, and on State Mining Administration, as amended by Act No. 499/1991 Coll., Act No. 154/1995 Coll., and Act No. 58/1998 Coll., to the extent of the mining license No. 1004/2002 issued by the District Mining Office in Bratislava on 17 April 2002
- - intra-state road freight transport
- - manufacture of concrete construction components
- manufacture of concrete products

The Company is registered in the Commercial Register of the District Court Bratislava, Section s.r.o., File No. 24344/F

Information on the environmental impact of ZAPA beton SK's operations

Production of ready mixed concrete is an activity that has generally little impact on the environment. Nevertheless, due attention should be paid to this area, because inadequate care during multiple operations related to the production of concrete may result in adverse effects on the environment. In well-maintained concrete mixing plants, the key areas of environmental impact are under constant surveillance. Monitored factors include noise, vibration, air, waste management and general cleanliness. It is also important to reduce water pollution and thus improve the quality of discharged wastewater.

Company management has set an environmental policy where the key strategy is maximum environmental protection. To achieve this target, the Company is committed to monitoring and meeting all binding legal requirements and to closely collaborating and actively communicating with all stakeholders. Continuous improvement of the environmental protection efficiency is achieved by using the latest available technologies, the expertise of Company and external experts and technical equipment to ensure a dust-free and waste-free production cycle at all concrete mixing plants.

In 2019, the costs incurred in connection with environmental protection amounted to * EUR 135,738. Investments related to environmental protection** in 2019 amounted to EUR 59,203.

7

In 2006, the Trebišov plant placed third in the national competition for the most environmentally-friendly concrete mixing plant, the Levoča plant took the top place in 2007, and the Prešov plant took the 2nd place in 2008.

In 2009, the Hlohovec plant placed 3rd in the same competition.

*The costs related to environmental protection are expenses which in the production process result in the improvement or maintenance of the environmental conditions, i.e. incurred for protection against emissions, waste disposal, water protection, noise and dust reduction, etc.

**Investments related to environmental protection are investments aimed to improve or maintain the environmental conditions.

Research, development and technology

Concrete is presently the most used construction material. Due to its availability and properties it facilitates rapid and efficient construction of increasingly technically and architectonically complex engineering projects. Broad applications of concrete in environments with stringent requirements in respect of strength and frost or chemical resistance are made possible by the composition of concrete and technological discipline in its production and processing. The use of suitable types of cements, admixtures and effective additives helps compensate for financial, energy and environmental demands of the production of various components of concrete.

Concrete mixing plants of ZAPA beton SK offer customers a wide range of products that are used for the construction of structures concreted at the building site, assembled structures and precast structural parts in all segments of building construction and civil engineering. These products comprise standard concretes of specified strength and environment classes, light concrete, self-compacting concrete, sprayed concrete, concrete for cement-concrete road paving, hydraulically bound and unbound mixtures for base layers, and the like. In addition, selected concrete mixing plants also produce self-leveling screeds from calcium sulfate (anhydrite) and cement.

Gravel sites of ZAPA beton SK and its subsidiaries extract, crush and sort aggregates for different purposes in line with the requirements of their customers.

All products are manufactured in compliance with applicable state technical standards (STN) and are marketed in accordance with applicable legislation.

Based on an analysis of customer needs, ZAPA beton SK in 2017 has launched a **NEMO** project, which aims to expand the range of products offered to include products the composition and properties of which are more closely linked to customer needs. NEMO - New Evolutionary Materials for InnOvations also allows to apply processes for manufacturing and utilization of concrete that ultimately increase labor efficiency and reduce the time needed for specific stages. We endeavor to inform the professional public about this project, new materials and their benefits at lectures organized by professional associations, open-house events, participation in construction fairs, etc.

To ensure the activities pursuant to Act No. 133/2013, on Construction Products, and Decree of the Ministry of Transport, Construction and Regional Development of the Slovak Republic No. 162/2013, establishing a list of construction product groups and parameter assessment systems, in 2017 the Company spent EUR 26,014 on the certification and recertification of the concrete and aggregate production management systems and on the activities related to research and development in the field of concrete production.

Currently ZAPA beton SK s.r.o. operates a testing laboratory in Žilina, where it performs control tests of products manufactured and used at the Company's plants.

We perform testing of hardened concrete samples in terms of their compressive strength according to STN EN 12390-3 Testing of hardened concrete. Part 3: Compressive strength of test bodies, depth of pressure water leakage according to STN EN 12390-8 Testing of hardened concrete. Part 8: Depth of pressure water leakage, absorbency according to STN 73 1316 Determining moisture content, absorbency and capillarity of concrete.

The compressive strength of bound mixtures is tested according to STN EN 13286-41 Non-bound and hydraulically bound mixtures. Part 41: Test method for determining the compressive strength of hydraulically bound mixtures.

Until the test date, all samples are stored in an air-conditioned chamber which meets the set standard treatment conditions.

Grain tests of aggregate fractions are performed according to STN EN 933-1 Tests for determining geometric characteristics of aggregate. Part 1: Determining granularity. Site analysis, fine grain quality assessment according to STN EN 933-8 Tests for determining geometric characteristics of aggregate. Part 8: Assessment of fine grains. Sand equivalent and STN EN 933-9 Tests for determining geometric characteristics of aggregate. Part 9: Assessment of fine grains. Methylene blue test.

In addition, the testing laboratory assesses the application of new components for the production of concrete that may be qualitatively or financially more viable. In laboratory conditions we can objectively compare the qualitative parameters of similar materials from multiple suppliers and ensure that our customers' requirements concerning the properties of the supplied products are met.

In 2019, our own testing laboratory's quantifiable performance amounted to EUR 63,615 (in 2019, 11,183 tests of test bodies were performed for compressive strength amounting to EUR 55,915, 308 site analyses worth EUR 7,700), and other tests.

Exposure to material risks and uncertainties

ZAPA beton SK s.r.o. has not identified any exposure to material risks and uncertainties.

Subsequent events

Between 31 December 2019 and the date on which the financial statements were authorised for issue, no events occurred that might have a significant effect on the Company's assets and liabilities, except for those resulting from ordinary course of business.

Projected business development

Workplace safety is one of the key points in terms of the company development sustainability that we wish to focus on in 2020. Our goal is to reduce the number of occupational injuries to an absolute minimum.

Sustainability is our another common goal.

The new project **NEMO** (New Evolutionary Materials for Inn**O**vations) starts to deliver positive results; we offer our clients increasingly efficient solutions through selling them our special products. **ZAPA DROP** seems to be a particularly attractive product for the future. This is drainage concrete for the final walkable or running layer, widely used. The concrete is a tailor-made product to meet special requirements, such as to retain water in cities and to make the climate more pleasant in the summer, while preventing flooding during heavy rains.

This year, we will continue to complete the Bratislava ring road project and our great goal is to focus on major infrastructure projects for the coming years 2021-2022.

We intend to strengthen our position on a highly competitive market not only through our products, but also through improving our overall image. It is still necessary to streamline our general communication, both internal and external. We also continue working on motivation of our employees by updating their KPIs and by another variable wage component EBITDA.

We have increased basic wages by an average of 4% since 1 January 2020.

We increased the value of meal vouchers to EUR 4.50.

We will support (approve) the contribution to sporting activities of employees' children and continue to motivate children to achieve good (excellent) school results for which they will receive a diploma and a financial reward at the end of the 2019/2020 school year.

The 2019 financial results are motivating us to meet plans for 2020; the year 2020 is our challenge to work even better.

In Bratislava on 21 February 2020

I. GENERAL INFORMATION

1. Company Details

Business name and seat

Date of establishment
Date of incorporation
Commercial Register)
Business activities

ZAPA beton SK s.r.o.
Vajnorská 142, 830 00 Bratislava
11 June 2001
18 June 2001

Production and sale of concrete mixtures;
Mining; and
Property and car leases.

2. Employees

Item	2019	2018
Full-time equivalent	98	120
Number of employees as at the reporting date	87	118
Of which: Managers	1	2

3. Unlimited Liability

ZAPA beton SK s.r.o. (hereinafter "the Company") is not an unlimited liability partner in any other entity.

4. Basis of Preparation for the Financial Statements

These financial statements represent the annual separate financial statements of ZAPA beton SK s.r.o. The financial statements were prepared for the reporting period from 1 January to 31 December 2019 in compliance with Slovak legislation, in the Act on Accounting and Accounting Procedures for Businesses.

5. Approval of the 2018 Financial Statements

On 19 March 2019, the General Meeting approved the 2019 financial statements of ZAPA beton SK s.r.o.

6. Members of the Company's Bodies

Executives: Ing. Katarína Gáborová since 31 May 2011

Ing. Andrej Hrabovský since 14 May 2014 (6 May 2014 as per the copy of the Commercial Register entry)

Marco Duranda since 14 May 2014 (06 May 2014 as per the copy of the Commercial Register

entry)

(Value data in tables are disclosed in whole euros unless stipulated otherwise)

8. Consolidated Financial Statements

The Company has been included in the consolidated financial statements of Dyckerhoff AG (Biebricher Strasse 68, 652 03 Wiesbaden). The consolidated financial statements of Dyckerhoff AG Group are prepared by Dyckerhoff GmbH, Biebricher Strasse 68, 652 03 Wiesbaden (registered by the registration court in Wiesbaden, Insert no. HRB 27594). These consolidated financial statements are available at the seat of the aforementioned company or at the seat of ZAPA beton a.s. (Vídeňská 495, 142 00 Prague 4).

II. ACCOUNTING PRINCIPLES AND METHODS APPLIED

- 1. The Company applies accounting principles and procedures pursuant to the Act on Accounting and Accounting Procedures for Businesses effective in the Slovak Republic. The accounting books are kept in the monetary units of the Slovak currency, i.e. euros.
- 2. The 2019 financial statements were prepared based on the going-concern assumption.
 - As at 31 December 2019, the Company incurred loss for the current reporting period in the amount of EUR 2,344 thousand.
- 3. Revenues and costs are recognised as they are earned or incurred under the accrual basis of accounting. All revenues and costs related to the reporting period are used as a basis regardless of their settlement date.
- 4. When measuring assets and liabilities, the prudence principle is followed, in all risks, losses, and impairments related to assets and liabilities and known as at the reporting date are used as a basis.
- 5. Revenues from the sales of own outputs and merchandise are exclusive of VAT. They are also net of discounts and allowances (rebates, bonuses, discounts, credit notes etc) regardless of whether the customer was pre-entitled to the discount or whether this discount was recognised subsequently.
- 6. Non-current and current receivables, payables, loans, and interest-bearing borrowings receivables and payables are disclosed on the balance sheet as either non-current or current following their residual maturities as at the reporting date. The portions of non-current receivables and the portions of non-current payables due within one year from the reporting date are disclosed on the balance sheet as current receivables and current payables, as appropriate.
- 7. Estimates made when compiling financial statements, the Company's management is required to prepare estimates and assumptions that influence the recognised amounts of assets and liabilities, and the disclosure of contingent assets and liabilities as at the reporting date, as well as the disclosed amounts of revenues and expenses during the year. The actual results may differ from these estimates.

Impairment of non-current assets

In order to assess the recoverability of non-current assets, the Company's management has prepared an impairment analysis of non-current assets using the method of discounted cash flows. Given the uncertainties relating to the implementation of the Company's management plans, the assumptions used in this analysis may significantly differ from the plan in the future.

8. Reported tax – Slovak tax legislation is relatively new, lacks precedents, and is subject to continuous amendments. Since various interpretations of tax laws and regulations in the application thereof to various transaction types exist, the amounts disclosed in the financial statements may later change, based on the ultimate opinion of the tax authorities.

9. Recognition of Individual Items of Assets and Liabilities - Initial Measurement

Upon acquisition, the cost principle is applied and individual items of assets and liabilities are measured as follows:

- a) Purchased non-current tangible and intangible assets at cost. The cost includes the acquisition price and the related incidental costs (transportation costs and customs duties).
- b) Non-current intangible assets generated internally at the lower of own costs and the replacement costs of assets. Own costs include direct costs associated with production or other activities and indirect costs attributable to production or other activities. Replacement costs represent the amount of consideration given to acquire the assets when recognised.

ZAPA beton SK s.r.o.

ID No. (IČO)

5 8 1 4 4 9

Notes to the Separate Financial Statements

Prepared as at 31 December 2019

Tax ID No. (DIČ) 2 0 2 0 2 8 3 5 7 3 (Value data in tables are disclosed in whole euros unless stipulated otherwise)

Non-current tangible assets generated internally - at own costs. Own costs include direct costs

- associated with production or other activities and indirect costs attributable to production or other activities.
- Non-current intangible and tangible assets acquired by other means at replacement cost, if assets d) are acquired for no consideration or newly identified during a stocktake, ie the amount of consideration given to acquire the assets when recognised.
- e) Non-current financial assets – investments in subsidiaries at cost. The cost represents the amount of consideration given to acquire the assets and the related incidental costs. The impairment is reflected by provisions.
- Purchased inventory at cost, which includes the cost of inventory and the related incidental costs f) (customs duty, transportation, insurance, commissions, discount etc). Interest on borrowed funds is not included in the cost. When disposing of inventory the Company uses the weighted arithmetic average cost method.
- Inventories developed internally are measured at own cost. Own costs are direct costs (direct g) material, direct wages and salaries, and other direct costs) and part of indirect costs immediately related to developing inventories internally (production overheads). Production overheads are included in own costs depending on the degree of completion of such inventories. Own costs do not include administrative overheads and/or costs of sales. Interest on borrowed funds is not included in own costs.
- Receivables: h)
 - When originated or acquired for no consideration at face value.
 - Where acquired (assigned) for consideration or through a contribution to the registered capital at cost, including the related incidental costs. This measurement is reduced for doubtful and bad receivables.

For non-interest bearing non-current receivables and long-term loans, the provision is included in the Correction column where the values of the receivable and loan/borrowing are adjusted to their present value, for example by using the effective interest rate method.

- i) Deferred expenses and accrued income - at the anticipated face value.
- j) Payables:
 - When incurred at face value.
 - Where assumed at cost.
- k) Provisions for liabilities - at the anticipated amount payable or applying actuarial methods.
- I) Bonds, interest-bearing borrowings, and loans:
 - When originated at face value.
 - Where assumed at cost.

Interest on bonds, interest-bearing borrowings and loans is recorded on an accrual basis.

- m) Accrued expenses and deferred income - at the anticipated face value.
- n) Current income taxes - pursuant to the Slovak Income Tax Act, current income taxes are determined based on the pre-tax accounting profits at the rate of 21% after adjustments for certain items for tax purposes.
- Deferred income taxes are recognised when temporary differences arise between the carrying amount of assets and liabilities as disclosed on the balance sheet and their tax base, with the possibility of carrying forward tax losses and transferring the unclaimed tax loss deductions to future periods. To determine the amount of deferred income taxes, the tax rate applicable in the subsequent reporting period was applied, i.e. 21%.

(Value data in tables are disclosed in whole euros unless stipulated otherwise)

10. Recognition of Individual Items of Assets and Liabilities – Subsequent Measurement

- a) Estimated risks, losses, and impairments related to assets and liabilities are reflected in provisions for liabilities, provisions for assets, and depreciation charges.
 - <u>Provisions for liabilities</u> are recognised at the anticipated amount payable. The Company creates provisions for unused vacation days including social security payments, bonuses, unbilled supplies and services with an unknown exact amount payable that are related to finished goods, merchandise and services sold before the end of the reporting period. The amount of provisions and the grounds for their recognition are assessed as at the reporting date.

• Provisions for assets are created:

- For receivables overdue by more than 180 days, a 100% provision is recorded; for receivables overdue up to 180 days, an individual provision is recorded according to the risk level.

• Amortisation/Depreciation plan

The amortisation of non-current intangible assets is determined based on the estimated useful lives and the estimated wear and tear. The depreciation of non-current tangible assets starts in the month non-current assets were placed into service. Intangible assets at a cost of up to EUR 2,400 are expensed as incurred.

Goodwill is amortised over five years.

The depreciation of non-current tangible assets is determined based on the estimated useful lives and the estimated wear and tear. The depreciation of non-current tangible assets starts in the month non-current assets were placed into service. Low-value tangible assets at a cost of up to EUR 754.00 are expensed as incurred and are monitored in sub-ledger records. Low-value non-current tangible assets with a cost (or own costs) ranging from EUR 754.00 to EUR 1,700 are depreciated over two years. Non-current tangible assets with a value exceeding EUR 1,700 are depreciated according to specific registration groups. Land is not depreciated.

Non-current tangible and intangible assets are depreciated according to a depreciation plan. The straight-line accounting depreciation method is applied.

The estimated useful life, depreciation method, and depreciation rates are as follows:

Type of Assets	Useful Life
Buildings and structures	20-40 years
Small structures, connections, metal containers, concrete	
machines	6-20 years
Transportation means, office equipment, machines	4-8 years
Technology, mixing machines, plastic site cabins, loaders,	
tanks, trailers, WAP, furniture, machines, ships, pumps	4-12 years
Software	5 years

b) Securities and equity shares are measured at cost, including the related incidental costs. A decrease in cost is recognized through provisions.

ZAPA beton SK s.r.o. ID No. (IČO) $\boxed{3\ \ 5\ \ 8\ \ 1\ \ 4\ \ 4\ \ 9\ \ 7}$ Notes to the Separate Financial Statements Prepared as at 31 December 2019 Tax ID No. (DIČ) $\boxed{2\ \ 0\ \ 2\ \ 0\ \ 2\ \ 8\ \ 3\ \ 5\ \ 7\ \ 3}$ (Value data in tables are disclosed in whole euros unless stipulated otherwise)

11. Translation of Amounts Denominated in Foreign Currency to Slovak Currency

Assets and liabilities denominated in a foreign currency are translated to euros using the reference exchange rate determined and announced by the European Central Bank (ECB) or the National Bank of Slovakia (NBS) on the date preceding the transaction date and also on the reporting date. Advances made and received in a foreign currency are not translated as at the reporting date. For foreign currency purchases and sales in euros, and upon the transfer of funds from an account established in a foreign currency to an account established in euros and from an account established in euros to an account established in a foreign currency, the exchange rates at which these amounts were purchased or sold were applied. If the sale or purchase of a foreign currency is performed at an exchange rate other than the one offered by a commercial bank in its foreign exchange list, the exchange rate offered by such commercial bank in its foreign exchange list on the transaction settlement date is used. If the sale or purchase is not performed with a commercial bank, the reference exchange rate determined and announced by the ECB or the NBS on the date preceding the transaction settlement date is used.

The capitalisation of raw materials includes gravel extraction at the gravel pit Ducové and Most, which is used to produce concrete at the Company's other locations.

VI. EXPENSES

1. Operating Expenses

1.1. Consumables and Services

Item	2019	2018
Cost of merchandise sold	80,462	142,668
Consumption of raw materials, energy and other non-inventory supplies	17,233,906	23,353,343
Services	5,734,907	6,745,087
Of which:		
Repairs and maintenance	451,011	744,629
Travel expenses	20,193	32,429
Entertainment expenses	7,427	19,058
Transportation of concrete	2,679,201	3,292,621
Concrete pumping	1,066,384	930,595
Rent of concrete plant	631	48,360
Telephone charges	34,667	36,803
Waste disposal	133,781	180,579
Other transportation	220,745	342,828
Tax consultancy	42,086	42,898
Extraction and transport of gravel	322,036	<i>327,579</i>
Rent of land	81,421	156,831
Rent of residential premises	22,892	20,555
Operating leasing	134,276	132,592
Safety and security	21,732	23,302
Other	496,424	413,428

1.2. <u>Costs of Services Provided by the Auditor, Other Operating Expenses, Finance Costs and Extraordinary Expenses</u>

Item	2019	2018
Cost of the auditor, audit firm, of which:		
Costs of auditing separate financial statements	10,521	10,248
Other assurance audit services	, -	· -
Related audit services	1,426	512
Other significant cost items of economic activity	426,832	323,319
Of which:		
Insurance of assets	41,129	45,243
Write-off of a receivable	-	-
Other	385,703	278,076
Creation of provisions for receivables	152,876	67,309
Finance costs		
Foreign exchange losses, of which:	18,072	34,276
Foreign exchange losses as at the reporting date		
	1,713	14,674
Other material items of finance costs, of which:	15,507	15,204

VII. INCOME TAX

The income tax rate for 2019 amounts to 21%. The Company applied no tax relief.

In this section is further stated:

Item	2019	2018
Amount of deferred tax assets recognised as expenses or revenues resulting		
from a change in the income tax rate	-	-
Amount of deferred tax liabilities recognised as expenses or revenues resulting		
from a change in the income tax rate	-	-
Amount of deferred tax assets related to tax losses carried forward, unclaimed		
tax deductions and other claims, as well as temporary differences from prior		
reporting periods, in respect of which no deferred tax assets were		
recognised in the prior periods	-	-
Amount of deferred tax liabilities originating due to non-recognition in the		
current period of a portion of the deferred tax assets recognised in previous		
reporting periods	-	-
Amount of unclaimed tax losses carried forward, unclaimed tax deductions and		
other claims, as well as deductible temporary differences, in respect of which		
no deferred tax assets were recorded	-	-
Amount of deferred income tax related to items recognised directly in equity		
accounts with no disclosure in revenues and expenses	-	-

The Company records the following income tax structure:

Reconciliation of Income Tax

Item	2019	2018
Current income tax:		
On ordinary activities	8,510	2,880
On extraordinary activities		
Deferred income tax:		
On ordinary activities	(579,632)	151,783
On extraordinary activities	-	, <u>-</u>
Total income tax	(571,122)	154,663

Total		(571,122)	-19.59	-	154,663	24.44
Current income tax	-	8,510	0.29	-	2,880	0.46
Deferred income tax	-	(579,632)	19.88	-	151,783	23.98
Total Income Tax		(571,122)	19.59		154,663	24.44

As at 31 December 2019 ZAPA beton SK leases:

- (under an operating lease): 32 motor vehicles up to 3.5t;
- in addition, it leases 5 motor vehicles up to 3.5t from ZAPA beton a.s.

The Company leases office premises, concrete-manufacturing facilities and land from third parties. The lease agreements are concluded for an indefinite period.

VIII. OTHER ASSETS AND OTHER LIABILITIES

Given that many areas of the Slovak tax laws have not yet been sufficiently verified in practice, there is an uncertainty as to their application by tax authorities. The level of such uncertainty cannot be quantified and will be eliminated once legal precedents or official interpretations by the relevant authorities are available.

Under the current Slovak legislation, the Company is obliged to pay an average one-month salary to retiring employees. The Company has estimated that the amount of this obligation is insignificant. The financial statements do not include any adjustments in this regard.

(Value data in tables are disclosed in whole euros unless stipulated otherwise)

IX. INCOME AND BENEFITS OF MEMBERS OF STATUTORY, SUPERVISORY AND OTHER BODIES OF THE COMPANY

Independent Auditor's Report

To the Owners and Statutory Representatives of ZAPA beton SK s.r.o.:

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of ZAPA beton SK s.r.o. ("the Company"), which comprise the balance sheet as at 31 December 2019, the income statement for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements of the Company give a true and fair view of the financial position of the Company as at 31 December 2019, and of its financial performance for the year then ended in accordance with the Act on Accounting No 431/2002 Coll., as amended by later legislation ("the Act on Accounting").

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing ("ISAs"). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Act on Statutory Audit No 423/2015 Coll. and on amendments to the Act on Accounting No 431/2002 Coll., as amended by later legislation ("the Act on Statutory Audit") related to ethics, including Auditor's Code of Ethics, that are relevant to our audit of the financial statements, and we have fulfilled other requirements of these provisions related to ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Statutory Representatives for the Financial Statements

Statutory Representatives are responsible for the preparation of the financial statements that give true and fair view in accordance with the Act on Accounting, and for such internal control as Statutory Representatives determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Statutory Representatives are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless Statutory Representatives either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of expressing
 an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Statutory Representatives.
- Conclude on the appropriateness of Statutory Representatives' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements including the presented information as well as whether the financial statements captures the underlying transactions and events in a manner that leads to their fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal and Regulatory Requirements

Report on Information Disclosed in the Annual Report

Statutory Representatives are responsible for the information disclosed in the annual report, prepared based on requirements of the Act on Accounting. Our opinion on the financial statements expressed above does not apply to other information contained in the annual report.

In connection with audit of the financial statements it is our responsibility to understand the information disclosed in the annual report and to consider whether such information is not materially inconsistent with audited financial statements or our knowledge obtained in the audit of the financial statements, or otherwise appears to be materially misstated.

We considered whether the Company's annual report contains information, disclosure of which is required by the Act on Accounting.

Based on procedures performed during the audit of financial statements, in our opinion:

- Information disclosed in the annual report prepared for 2019 is consistent with the financial statements for the relevant year,
- The annual report contains information based on the Act on Accounting.

Additionally, based on our understanding of the Company and its situation, obtained in the audit of the financial statements, we are required to disclose whether material misstatements were identified in the annual report, which we received prior to the date of issue of this auditor's report. In this regard, there are no findings which we should disclose.
